

 **MyTower**
Beyond Borders

MyTower TMS Road & Overseas

Digitize your Transport Operations

Manage your national and international flows efficiently

The challenges for Transport and Supply Chain departments are changing radically: omnichannel, multi-sourcing, increased customer demands, complex regulations, etc. Shippers must show better responsiveness, agility, and innovation while optimising their transport costs.

MyTower TMS Road & Overseas offers all the collaboration, task automation, monitoring, and event anticipation features of a collaborative transport platform, enriched with optimisation modules that enable you to make new productivity gains and optimise your transport costs.

Benefit from all the advantages of a collaborative platform

- **Improve** collaboration.
- **Automate** your organisational tasks.
- **Anticipate** events on every shipment.
- **Increase your customer' satisfaction.**

Automate your operations

- **Reduce all your actions** on the platform to the minimum thanks to a powerful action automation module.
- **Only focus on exceptions.**

Reduce your transport costs

- **Group your orders and shipments** into a single transport order with the help of a powerful grouping engine to reduce the number of shipments and increase the fill rate of your means of transport.
- **Reduce the amount of space** in your means of transport thanks to a 3D visualisation and simulation tool for your loads.
- **Optimise the number of kilometres** based on your order book and delivery constraints thanks to a route optimisation engine.

Track your CO² emissions

- **Calculate and monitor your transport carbon footprint**, thanks to an interface with recognised solutions on the market to make your supply chain greener and more sustainable.
