

MyTower TMS Supply Chain Import

Digitalize your Supply Chain Import

Digitize your purchases with TMS solution

Import supply chains involve extensive interactions with suppliers who manufacture the orders you place. Managing the fulfillment of orders, coordinating deliveries, and arranging transportation from suppliers to your warehouse require a high level of collaboration among all stakeholders.

MyTower TMS Supply Chain Import

and Procurement promotes collaboration among all involved parties and streamlines the management of your orders and shipments. It enables you to optimize your import flows while enhancing order visibility. With this tool, you can effectively control, monitor, and optimize your expenses..

Encourage collaboration

- **Enhance collaboration** among all stakeholders by using a unified platform that allows you to consolidate information, data, and documents in one place, giving you full control over your operations.
- **Foster collaboration** with your suppliers using a dedicated collaborative platform tailored for effective exchanges.

Optimize Your Import Flows

- **Efficiently manage** different levels of multi-segment, multi-activity, and multi-product consolidation within a single transport medium, all on a single platform.
- **Reduce** batches for more efficient handling and transportation.
- **Optimize** load planning to maximize utilization of available capacity and reduce wasted space.
- **Decrease your transportation** costs and free up financial capital by implementing streamlined import and procurement flows.

Facilitate Order and Shipment Management

- **Easily manage** multiple shipments associated with the same order and proactively calculate scheduling based on arrival to ensure timely delivery.
- **Organize quality inspections** to verify that products meet your specified requirements and easily collect inspection results within the platform.
- **Efficiently schedule and organize** appointments at your receiving docks for smooth receiving and unloading processes.

Enhance Order Visibility

- **Access all packing** lists and their adjustments in real-time during the modification phase, ensuring accurate and up-to-date information.
- **Track the progress** of your orders and document flows from initiation to completion using our Track & Trace application.
- **Maintain control** over product volumes and ensure information reliability throughout the supply chain.
- **Receive automatic alerts** in case of incidents or delays, enabling you to quickly identify and implement alternative solutions.

Control, Monitor, and Optimize Your Expenses

- **Cover** all stages of product payment, from pre-invoicing to controlling the costs of transport services and logistic flows.
- **Simplify** payment processes using letters of credit.
- **Utilize** advanced cost breakdown systems to **accurately calculate import cost** per product, allowing you to efficiently optimize your expenses.

Why Choose MyTower Supply Chain Import Solution? ?

- ▶ **Trust Industrialists and Distributors:** As a leading solutions provider, the Supply Chain Import and Procurement version of MyTower TMS is the preferred choice for industrialists and distributors seeking reliable and innovative transport management solutions.
- ▶ **Expertise in Transportation and Information Systems:** Benefit from our in-depth knowledge of transport business processes and our expertise in information systems, ensuring a robust and comprehensive solution for your road and international transport needs.
- ▶ **Powerful Integration Capabilities:** MyTower Supply Chain Import and Procurement can be easily integrated with various types of ERP, OMS, and WMS systems, providing a unified platform for efficient transport management.
- ▶ **Flexibility and Modularity:** Adapt the solution to your specific needs through our flexible and modular approach. Choose the features that match your requirements and expand the range of functionalities as your business grows.
- ▶ **Scalable for All Businesses:** Whether you're a multinational corporation or a small to medium-sized enterprise, our solution is designed to adapt and cater to your needs, while offering optimal efficiency.
- ▶ **Custom Collaborative Processes:** Enjoy easy-to-implement custom and collaborative processes that ensure seamless integration with your existing operations and foster collaboration among stakeholders
- ▶ **Comprehensive Functional and Geographic Coverage:** Benefit from one of the broadest functional and geographic coverages in the market. Our solution encompasses a wide portfolio of business processes, covering all modes of transport.
- ▶ **Rapid and Efficient Implementation:** Our team of project management experts ensures an efficient implementation of our solutions. Depending on your objectives, we can deploy a pre-packaged version of our solution within a few days, or, thanks to our high level of configuration, we can adapt to your business context and meet your customization needs while staying within our standard.
- ▶ **Immediate Return on Investment:** By digitizing your transport operations, you improve operational efficiency, increase visibility into your operations, reduce your carbon footprint and CO2 emissions, all while enhancing customer satisfaction rates

**The solution to
optimize your import
and procurement
flows and enhance
the visibility of your
orders and
shipments**
